Human Maturation

The School Board of Pikes Peak School of Expeditionary Learning (PPSEL) believes it is appropriate for students to have a comprehensive understanding of all systems of the human body. In accordance with state law, PPSEL will include maturation and human sexuality in its scope and sequence for students.

The PPSEL School Board affirms their belief that it is the parents and guardians' right, privilege and responsibility to be the primary influence and voice to their children in their moral development. In accordance with applicable state law, students' parents/guardians shall be notified in writing prior to the student's involvement in the health education course. Parents and guardians have the option to "opt out" of this program without consequences.
